INTRODUCING YOU to FUNCTIONAL WELLNESS

Functional Wellness...is a science-based, healthcare approach that assesses and treats underlying causes of illness through individually tailored therapies to restore health and improve function. Our practice is dedicated to working with you until we uncover the source of your problem.

Named diseases are just the tip of the iceberg. Below the surface, according to Functional Medicine, are the real causes of a patient's health problems.

WE LEAVE NO STONE UNTURNED

CORE PRINCIPLES OF FUNCTIONAL MEDICINE

- Each person is unique, with unique healthcare needs
- Health is more than simply the absence of disease
- Balanced biochemistry is essential to proper functioning

PRACTICE PROTOCOLS

- We perform a system analysis and review health history and prior lab testing results before the initial one hour consultation
- We use Quest Laboratories locally for our comprehensive blood chemistry profiles but have joined a national health care organization which has negotiated deep discounts to make it affordable to all
- We focus on how the body is functioning by using narrower optimum lab ranges instead of standard values to detect dysfunction prior to an actual disease state
- Improved patient outcomes through personalized genetic testing to identify MTHFR variations and other methylation dysfunction

Traditional Chiropractic Care, state-of-the-art electronic instrument adjusting and functional rehab also available
